

# Think your computer might have a virus??

Run the Barracuda SpyWare Removal Tool.  
Follow these easy steps:

On the District Services > Technology page, click the link for **Barracuda SpyWare Removal Tool**

At the prompt, click the button to start the Removal Tool

If prompted, accept the security certificate, allow the website to run the ActiveX Control and then install the program.

**Barracuda Spyware Removal Tool**

The Barracuda Spyware Removal Tool performs a comprehensive scan of your computer for any traces of spyware or other malware. This scan is very thorough and takes several minutes to complete. After the analysis is complete, you can remove all the malware and traces of malware that have been found.

The Barracuda Spyware Removal Tool is very comprehensive in its analysis and removal. It detects and removes many small traces, cookies, potential spyware files, and temporary files from your computer. Many of these items pose very minor risk and blocking them can cause some Web sites to malfunction, therefore the Barracuda Web Filter does not block them at the network level. As such, the Barracuda Spyware Removal Tool will typically identify items for removal that are not blocked at the network level by the Barracuda Web Filter.

For maximum security, complete removal of these files from your computer is recommended.

Do you want to install this software?

Name: BarracudaSpyRemoval.cab  
Publisher: **Barracuda Networks**

More options

While files from the Internet can be useful, this file type can potentially harm your computer. Only install software from publishers you trust. [What's the risk?](#)

Once installed, click the SCAN button and let the removal tool run.

It may take up to 30 minutes depending on the size of your hard drive. As it scans, the progress bar will show the progress.

please wait ...

Powered by **PC Tools Software**

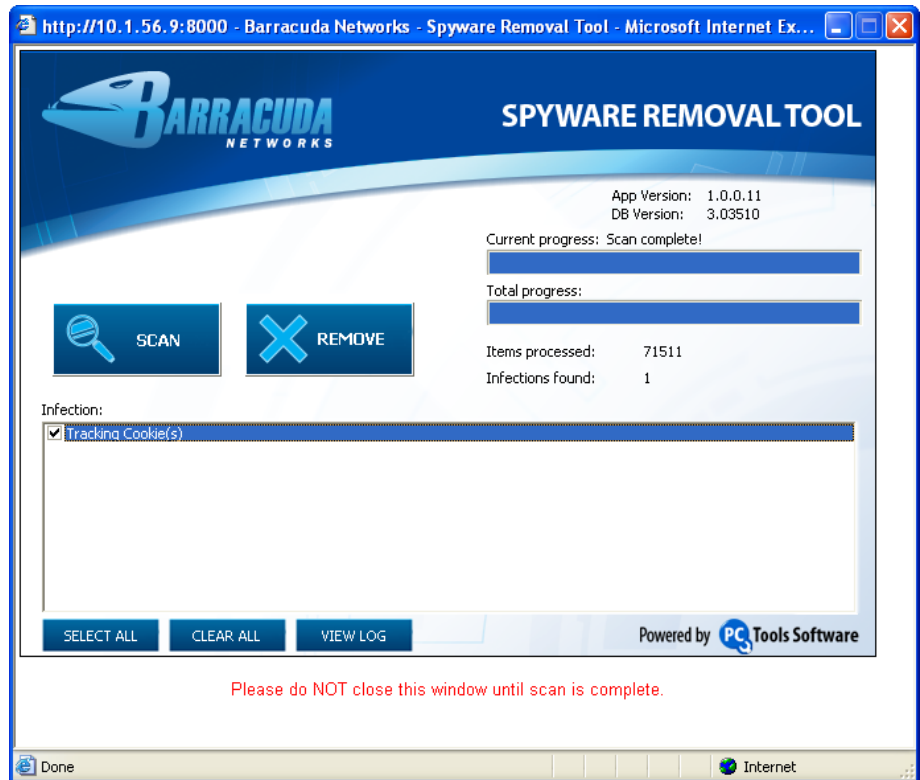

Please do NOT close this window until scan is complete.

Wait patiently!! You can continue to use your computer as the scan progresses, if you choose. Just don't close the Removal Tool window while it's scanning!

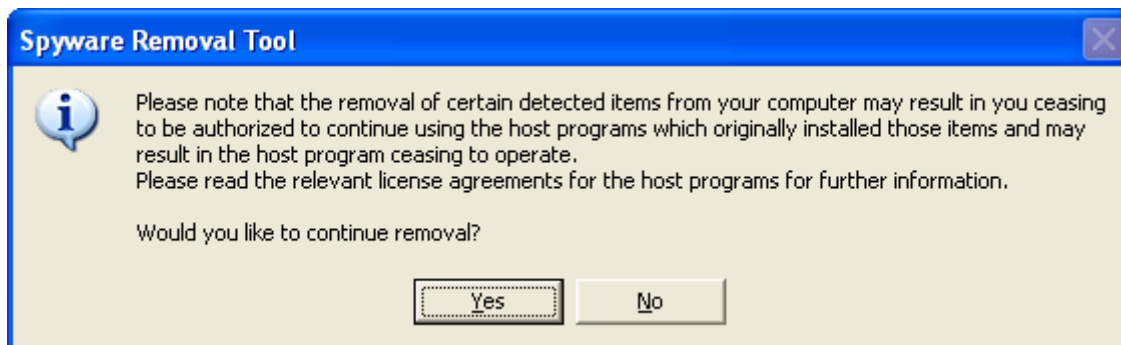

When completed, a list of infections will display in the lower part of the window. Depending on your computer, you may have several categories of infection, or you may have none!

If you want to view details of the spyware found, click the **View Log** button.

You will probably want to **REMOVE** all the infectious files found so with all categories checked, click the **REMOVE** button.

You will see a prompt:

Go ahead and click **Yes**.

A prompt will display to show how many infections were removed. If there are any infections that were not removed, please let Tech Support know and we will follow up.

If you have any problems running programs after running the removal tool, contact Tech Support.

Click **OK**, close the browser window and enjoy your squeaky clean computer 😊
